2nd DRYLANDS SUMMER SCHOOL

September 12 – 15, 2024, Nairobi (Kenya)

The Drylands Summer Schools explore transformative approaches to building climate resilient drylands. This second edition is focused on monitoring drylands and agrosilvopastoral systems for enhanced sustainability. Participants will graduate the course as experts on integrating transformational socio-economic and sustainable practices in dryland agrosilvopastoral production and management!

FURTHER INFORMATION

- The summer school will take place at the CIFOR-ICRAF Campus in Nairobi, Kenya.
- Participants have experience in dryland management and completed FAO's e-Learning course on dryland forests and agrosilvopastoral systems.
- Each participant will work on their own case study on drylands agrosilvopastoral management during the summer school.
