WEBINARS SERIES ON RAINWATER HARVESTING

1st November 2022, 13 h 00 – 14 h 30 (GMT+2)

Module n°9:

**Gender mainstreaming in
rainwater harvesting applications**

Session: Gender equality and women empowerment in RWH systems

Date: Tuesday 1st November 2022 **Time:** 13 h 00 – 14 h 30 (GMT+2)

Register: *Gender equality and women empowerment in RWH systems*

BACKGROUND

Water scarcity is a critical challenge in countries and regions with arid and semi-arid conditions and fast-growing water demands. This is mostly the case in all of the countries across the NENA Region, where food demand and food insecurity continue to grow, widening the water supply-demand gap in most countries. Furthermore, the anticipated impact of climate change in the NENA region is indicative towards an increased intensity of rainstorms and flash floods, while the total amount of annual precipitation rates shows declining trends. During the last 20 years, interest has been renewed in rainwater harvesting (RWH) as one of the most effective climate adaptation strategies to cope with water scarcity, thus reducing the pressure on the limited freshwater resources and increasing rainfed crop productivity.

This webinar series on Rainwater Harvesting aims to provide an overview of RWH applications and illustrates, with country examples, the diversity of approaches. It will try to unlock the potential of rainwater harvesting applications in the NENA region by highlighting the role of rainwater management in overcoming the current challenges in achieving water security. It will also shed the light on the need for innovations in economics, social consensus and supportive laws and regulations to ensure a widespread uptake of RWH technologies in the NENA region.

Main Conveners:

FAO/WEPS-NENA project & Water Scarcity Initiative (WSI) with: ICARDA, ICID and FAO *inter-Regional Technical Platform on Water Scarcity* (RTP-WS)

Contributing Partners:

IWMI Regional Office for West Africa (Ghana), FAO Subregional Office for West Africa (Senegal) and FAO Subregional Office for Mesoamerica (Panama)

ABOUT THE MODULE 9

This module discusses how gender mainstreaming in RWH projects contribute to gender equality and women empowerment. This module also highlights the extent to which gender mainstreaming in RWH systems strengthens livelihood security of rural communities. The discussions will draw from various case studies from the Sahel and the Gulf of Guinea.

CERTIFICATE OF ACHIEVEMENT

A digital certificate of achievement will be offered by FAO to participants who:

- Attend at least four webinars belonging to Module 1 to Module 4 and five webinars belonging to Module 5 to Module 10;
- Obtain a score of no less than 70 percent in each of two written assessments that include multiple-answer questions and reflect the content of the aforementioned modules.

The first assessment covering the modules 1 to 4 was organized in August 2022. The link to the second assessment, covering the modules 5 to 10, will be sent by email at the end of the year to eligible participants who will be given two weeks to submit their answers. Respondents will have the possibility to make two attempts to answer the assessment questions, and only the highest score will be considered.

Important note: For participants who wish to obtain a certificate of achievement, to be able to track your attendance, you must register and join the webinars using the same e-mail address.

Speakers and moderator

Bamby Sankhare

is an Agronomy Engineer, specialized in Rural Development Engineering, graduated from the National School of Agriculture in Meknes (Morocco). She works within the Resilience Team of the FAO Sub-Regional Office for West Africa/Sahel (REOWA/SFW) in the management and development of resilience and emergencies programs. She ensures the regional coordination of the Package of Integrated Services for Resilience in West Africa/Sahel ('1 Million Cisterns Initiative for the Sahel' and the 'Caisses de Resilience'). Before joining FAO, Bamby worked with international NGOs (Agronomes et Vétérinaires Sans Frontières, Innovation Environment Development Africa) on strengthening and providing technical support to Farmers' Organizations on early warning, climate change and natural resources management.

Everisto Mapedza

is a Senior Researcher at the International Water Management Institute based in Accra, Ghana. He has a PhD from Edinburgh University. His research interests are on drought, gender, institutions, governance, social transformation using the land, water and broadly natural resources lens in developing countries. Everisto recently joined the World Meteorological Organization's Societal and Economic Research Applications Working Group under the World Weather Research Programme. Everisto was the lead Editor of the 2019 Elsevier-published book entitled: "Drought Challenges: Policy Options for Developing Countries". He serves as an Associate Editor for Society and Natural Resources journal. He was previously a Research Fellow at the London School of Economics and Political Science

Ines Beernaerts

is a Senior Land and Water Officer at the Sub-regional office for Mesoamerica of the Food and Agriculture Organization of the United Nations. She holds a Master in Agricultural Engineering (Free University of Brussels) and a Master of Engineering, Hydrology and Water Resources (University of South Australia). She has over 20 years of UN experience (UNICEF and FAO) in designing and managing large-scale programmes / projects on land and water resources management at global, regional, sub-regional and country levels, with a focus on Sub-Saharan Africa, Central Asia and Mesoamerica

Module 9: Gender mainstreaming in rainwater harvesting applications

Session: Gender equality and women empowerment in RWH systems

Date: Tuesday, 1st November, 2022

Time: 01:00 PM - 02:30 PM (GMT +2)

Time	Activity
01:00 – 01:05	Welcoming Remarks Introduction to the session objectives and speakers By: Ines Beernaerts , Senior Land and Water Officer, FAO Mesoamerica
01:05 – 01:30	Presentation on “One Million Cisterns for the Sahel Initiative” By: Bamby Sankhare , Programme and Operations Resilience Specialist, FAO West Africa
01:30 – 01:55	Presentation on " Rain Water Harvesting: Why Gender Equality and Social Inclusion (GESI) Matters" By: Everisto Mapedza , Senior Researcher: Social and Institutional Scientist, IWMI Ghana
01:55 – 02:25	Open Discussions – Q&A's
02:25 – 02:30	Conclusion & Wrap-up

This activity is implemented within the regional project "Implementing the 2030 Agenda for water efficiency/productivity and water sustainability in NENA countries" under the umbrella of the Water Scarcity Initiative. This regional project is implemented by the Food and Agriculture Organization of the United Nations and funded by the Swedish International Development Cooperation Agency (SIDA).
